PROFESSIONAL SUMMARY

Software Engineer with 2 years of experience at Barclays, building high-performance fintech applications using **Angular** and **Spring Boot**. Delivered measurable impact in an Agile environment — **up to 34% UI load time reduction**, **50–60% cut in manual regression effort**, and unit test coverage scaled from **0% to 90%**. Experienced across the full stack, from secure API design to containerized deployments in a regulated banking environment.

EDUCATION

Qualification	Board / University	Institution	Year	Score
B. Tech Information Technology	Anna University	College of Engineering Guindy, Anna University	2024	9.35 CGPA
Class XII	CBSE	SBOA School & Junior College, Chennai	2020	97.2%
Class X	CBSE	SBOA School & Junior College, Chennai	2018	96.4%

WORK EXPERIENCE

Section	Key Contributions & Achievements
Barclays Software Developer Chennai, India Jul 2024 – Present	
Role Overview	- Developed scalable Angular standalone components using Signals, reducing UI load time by up to 34% on high-density data screens - Built AG Grid dashboards with Master-Detail views and dynamic column rendering, improving data visibility for complex operational reporting - Designed enterprise-grade forms using Reactive Forms and custom validators, supporting multi-step workflows across critical banking modules - Modernized legacy services by migrating Spring to Spring Boot, improving system maintainability across banking workflows - Implemented secure role-based authentication and authorization, enforcing controlled API access across enterprise endpoints - Increased unit test coverage from 0% → 90% (Angular + Java), significantly reducing UI defects and improving release stability - Enforced 80%+ unit test and SonarQube coverage gates for all new code, sustaining code quality KPIs across every release cycle - Ensured security compliance through Veracode scans on all deployments, proactively identifying and mitigating vulnerabilities - Automated API & UI testing using Karate, resulting in a 50–60% reduction in manual regression effort and faster release cycles - Optimized GitLab CI/CD pipelines to streamline automated deployments across environments, reducing release friction - Built Docker images and deployed containerized services on Rancher, enabling consistent and reliable releases across environments - Developed PowerShell automation to consolidate multi-sheet file processing, cutting a 4-step manual upload process down to one - Developed and scheduled shell script-based jobs using Autosys, ensuring reliable execution of critical data processing workflows - Received two formal recognitions at Barclays for quick learning and continuous improvement initiatives
Barclays Intern Developer Chennai, India Jun 2023 – Aug 2023	
Internship	- Developed Angular dashboards, to visualize financial and operational data, significantly improving end-to-end visibility of funding requests for business stakeholders. - Designed and implemented Spring Boot services for data migration from Oracle → MongoDB - Recognized for stewardship for exploring Panther Chart Visualizations with drill-down options beyond existing reporting solutions

TECHNICAL SKILLS

Category	Technology
Frontend	Angular TypeScript HTML5 CSS3 SCSS
Backend	Spring Boot Java REST APIs C C++
Database	Oracle MongoDB PostgreSQL SQL
DevOps & Tools	Git GitLab CI/CD Docker Kubernetes (Rancher) SonarQube Veracode Autosys Karate PowerShell

PROJECTS

Project	Description
Multimodal Image Generation 01/2024 – 05/2024	Developed a multimodal image generation system integrating CNN-based image captioning, NLP embeddings, attention mechanisms, and latent diffusion to generate high-quality, context-aware images from image + text inputs.
Crop Recommendation System 01/2023 – 05/2023	Developed a machine learning-based crop recommendation system that suggests optimal crops based on soil nutrients and environmental parameters, enabling data-driven agricultural decision-making.
Online Mobile Shopping Website 11/2021 – 01/2022	Built a full-stack online mobile shopping website for multiple brands using HTML, CSS, JavaScript, PHP, and PostgreSQL, supporting product browsing, user management, and order processing.

ACHIEVEMENTS & LANGUAGES KNOWN

Achievement	Details
Academic Proficiency Award	Received for 5 consecutive years at school
Subject Topper	Scored Centum in Social Science - CBSE Class X
Languages	English (Professional Proficiency), Tamil (Native)
